

Health & Safety update

Trustee training session

I am waiting for confirmation from Shelley Major of Major Consulting Group that 16 May at 4pm prior to our normal monthly Board meeting will work for her. Once confirmed I will contact Masterton Lands Trust to establish whether they wish to join in the session.

Legislation

Worksafe provides an online tool called SafePlus for running health and safety assessments tailored to an organisation and getting actionable guidance and practical advice on how it is performing. I am planning to use the tool to identify matters that could prove useful for the Board to be aware of ahead of the training session.

A scan of Worksafe's website has shown up a recent notification from ACC (attached as Appendix 1) regarding access by small and medium sized businesses to subsidies from a \$22million Government fund. Given the emphasis placed on the workplace injury prevention subsidies being targeted at sectors where workers have a higher risk of injury I doubt though whether the Trust would be successful with any application.

Trust activities

We are updating evacuation procedures for 124 Main Street.
