

Health & Safety update

Not a lot to report on for this meeting. I have been looking into local seminars / courses for health and safety representatives for possible attendance in the near future.

64 Main Street – Fire Evacuation Scheme

Scheme finally approved by Fire Emergency NZ (FENZ) and a successful trial evacuation was held on 22nd July with all three tenancies participating, along with myself. This was facilitated by Nigel Carter, SWDC H&S Officer. It was also a good opportunity for the three tenants to meet each other properly. Laminated Evacuation Plan and Fire Action notices have been placed in each tenancy. Next trial evacuation scheduled for January.

No R&M work has been undertaken that required any health and safety documentation.
