Development at Cobblestones

You may be aware from broad discussions in the latter part of last year, that we are looking to carrying out some building work.

This will involve the amalgamation of what are effectively the two farm-type buildings on the southern side of the site, and their extension rearwards. This will about double their size. At the same time, we want to enclose the space with a period-appropriate façade and line the interior. The result will be museum quality space which will both protect our collection and allow for better displays and interpretation.

We are about to apply for a consent from SWDC. With GTLT the ground lessor, SWDC requires your written consent to the proposed works.

We would appreciate a letter in support of this work. We can forward you a plan, should you wish.

Regards
